Science Arts & Métiers (SAM)
is an open access repository that collects the work of Arts et Métiers Institute of Technology researchers and makes it freely available over the web where possible.

This is an author-deposited version published in: https://sam.ensam.eu
Handle ID: .http://hdl.handle.net/10985/20178

The authors would like to inform the readers that erroneous Figs. 4 and 5 were unfortunately uploaded during the proof revision process of the original paper.[1] The correct figures are below.

The authors wish to apologize for any inconvenience caused by this error.

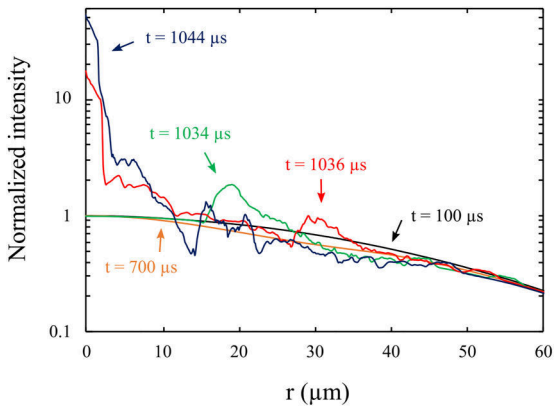

FIG. 4. Distribution of normalized absorbed laser intensity (log scale) at different instants.
